

The Wisconsin Alumni Research Foundation (WARF) is the private, nonprofit patent and licensing organization for the University of Wisconsin–Madison, one of the world's great research universities. WARF was founded in 1925 and is a pioneer and innovator among university-based technology transfer offices.

Dear Spencer,

Thank you again for your recent work to coordinate and deliver the Keynote presentation at the first session of Entrepreneurons for 2015. Your talk on the power of networking was very well received, as was the discussion fueled by the panel of experts you assembled to expand perspectives on the subject.

It was a pleasure to work with you throughout the planning, and we're particularly appreciative of the way you put your ideas into action by bringing new faces to our long-running series. We're delighted to welcome such a wide range of community members to the program and are benefitting first hand from your networking prowess.

We look forward to learning more about your methods through your book and will stay in touch as we work to ensure that all who are interested are able to participate in programs and activities in the Town Center of the Discovery building.

Sincerely,
Laura Heisler

Laura Heisler

WARF Director of Programming

WARF is ranked sixth in the world in patents obtained for new technologies, with 160 patents issued in 2013 alone.
